CaseDelta

The AI associate for the 80% of law firms that enterprise legal AI ignores.

Founder:

CAMREN HALL | CAMREN@CASEDELTA.COM

Problem

Lawyers won't risk client data, won't pay $1K/seat, and won't abandon their existing tools. Every legal AI on the market asks them to do at least one.

- **Security.** Data privacy is the #1 cited barrier to AI adoption in legal. Over half of lawyers flag it as their top concern. [1]
- **Cost.** Enterprise legal AI requires seat minimums and four- to five-figure annual commitments. The majority of firms are priced out entirely.
- **Workflow.** Lawyers live in Clio, email, and Google Drive. They won't learn a new platform, and shouldn't have to.

Solution

Delta is another seat in your firm.

Delta gets its own login to Clio, MyCase, and Google Drive - the same way you'd onboard any new hire. It reviews cases while you're in court, flags what needs attention before you ask, drafts follow-ups for your approval, and remembers how your firm works so you never have to explain twice.

No new platform. No data sent to third parties. Full audit trail for bar compliance.

A Day with Delta

- **7 AM** - Partner opens CaseDelta. Delta already reviewed all active cases: 3 findings, 3 drafted actions. Review and approve in 4 minutes.
- **During the day** - Delta runs in background. Client submits docs → Delta analyzes, flags missing items, drafts follow-up. Queued for partner's next login.
- **End of day** - Two-minute check-in. Approve, edit, dismiss. Nothing fell through the cracks.

Product

- **Proactive case monitoring.** Delta reviews your caseload overnight - flags deadlines, missing documents, and anomalies. Findings and drafted actions ready before you walk in.

- **Deep document intelligence.** Structured extractions, cross-document anomaly detection, and cited Q&A across files of any size.

- **Institutional memory.** Delta learns from instructions, feedback, and self-evaluation. Gets smarter about your firm every day. That knowledge never leaves.

- **Secure by architecture.** No client data sent to third parties. Full audit trail on every action. Bar-compliant by design.

The Moat - Institutional Memory

After 6 months, Delta has 200+ firm-specific memories: style preferences, quality corrections, extraction patterns, practice-area SOPs.

Three automatic learning routes:

1. Attorney tells Delta → remembered instantly
2. Thumbs-down feedback → nightly corrective learning
3. Self-evaluation → Delta catches its own mistakes and never repeats them

Switching cost: Canceling means losing all accumulated knowledge. No other legal AI builds this.

Market

$2.67B legal AI market (2026) → $4.42B by 2031. Within a $1T+ global legal services market.

ICP: 5–50 attorney firms in med-mal, commercial lit, employment, PI, IP. Managing partners billing $300+/hr, drowning in review.

Two segments we own:

- Priced out of enterprise (can't buy Harvey/Legora)
- Security-conscious (tried ChatGPT, stopped)

Business Model

Tier	Price	Target
Self-serve	Usage-Based ($50 free Credit)	Solo-4 Attorneys
Practice	$799/mo	5-10 Attorneys
Firm	$1,499/mo	10-25 Attorneys
Enterprise	$2,499/mo	25-50 Attorneys

Buyer math:
Paralegal = $50–70K/yr.
Delta = $6–12K/yr.
Same work, no turnover.

Gross margins: ~70%.

Competitive Landscape

	CaseDelta	Harvey	Legora	Paxton	CoCounsel
10-Attorney Cost	$799–$1,499/mo	Can't buy	Can't buy	$2,250–$5,000/mo	$1,590–$4,990/mo
Model	Per-firm flat	Per-seat (min 40)	Per-seat (min 30)	Per-seat	Per-seat
Type	Proactive case mgmt	Reactive research	Reactive research	Reactive research	Reactive research

The difference: They're search tools - you prompt, you wait. Delta monitors your cases and has findings ready before you ask.

Founder

Camren Hall: Vanderbilt University - CS + Applied Mathematics. Ex-Capital One Software Engineer; AWS-certified.

Went door-to-door across 4 industries. Identified legal as the most underserved vertical for AI. Interviewed 20+ attorneys and paralegals. Built around what they actually need.

Sole architect. Sole salesperson. Onboards every firm personally. First pilot firm is live on real client cases.

FOUNDER, CEO

Traction

Production-ready at app.casedelta.com - full feature set live

- Multiple KC firms in active pipeline
- 12-month target: ~200 firms, ~$99K MRR, ~$1.19M ARR

The Ask

Seeking angel investment to accelerate product development and ignite the growth flywheel in legal's most underserved market.

- **Product velocity.** Ship the proactive morning briefing, Clio marketplace listing, and self-serve free tier
- **PLG engine.** $50 in free credits → Delta finds something the lawyer didn't know → paid conversion. Every happy firm refers 5 more.
- **Trust credibility.** CLE speaking slots, bar association partnerships, LPL insurer endorsements.

casedelta.com

Proactive. Secure. Gets smarter every day.
